Job Description:

Hi XXXXXXXX

Greetings.

Hope you are doing good.

As a Professional ETL **QA Tester**, you will have the ability to share new ideas and collaborate on projects opportunity with Deloitte under our Project Delivery Talent Model. Project Delivery Model (PDM) is a talent model that is tailored specifically for long-term, onsite client service delivery. The US Core Technology Operations delivers large scale software applications and integrated systems and assists its clients with architecture design, assessment and optimization, and definition. The practice aims at developing service-oriented architecture (SOA) and other integration solutions to enable information sharing and management between business partners and disparate processes and systems. It would focus on key client issues that impact the core business by delivering operational value, driving down the cost of quality, and enhancing technology innovation.

Roles & Responsibilities

- Design Test Strategy, Test Plans and Automation for QA of ETL functionalities implemented across variety of custom scripts, jobs, and packaged solutions
- Perform partial E2E validations of the ETL scenarios with multiple test scenarios and test data
- Replicate production ETL failure scenarios & triage field issues for Development Teams to fix
- Ability to spot automation opportunities beyond automation of regression suite. For e.g. automation of integration testing, batch testing, prod readiness checks etc.
- At least 1 years of experience in testing ETL and Data Warehouse applications in cloud environment
- 1 years of writing SQL Queries
- Experience in REST API testing and working with tools such as Postman to test API calls
- Experience in creating test plans and test cases based on business requirements.
- Thorough knowledge of fundamental quality assurance concepts and best practices is required
- Ability to communicate effectively with both technical and non-technical team members
- Limited immigration sponsorship may be available
- Demonstrated attention to detail, commitment to continuous improvement and focus on excellence in work product delivery
- Demonstrated an ability to use quantitative data to inform decisions
- Strong team player who can build and maintain strong relationships across a matrixed organization
- Strong ability to direct and handle multiple, simultaneous projects under deadline pressure and in a fast-paced environment
- Flexibility/adaptability - comfortable working with ambiguity and continually evolving priorities
