Hi XXXXXXXX

Greetings.

Hope you are doing good.

As a Professional ETL QA Tester, you will have the ability to share new ideas and collaborate on projects as a consultant opportunity with ACCENTURE under our Project.

Roles & Responsibilities

- Candidate should have one year of ETL testing experience
- Excellent skills on working with database queries
- Writing complex queries which include multiple joins and conditional statements updating existing queries written by other tester understanding existing code in Stored procedures / DB Views
- Should know how to work with batch logic like soft deletes/timestamps / current record vs historical records, how to use foreign keys and surrogate keys
- Ability to understand data mappings in mapping documents and ask questions if there are any
- Candidate should have worked on batch feeds / Data warehouse updates.
- Ability to use CA Workload or any other job scheduling/batch job management tool will be an advantage
- Ability to use Informatica or SSIS or Wherescape or any other tool will be an added advantage
- Understand look-ups, and transformation logic provided in the design documents and ask questions if there are any
- Ability to engage and discuss with data architects/data developers, ask questions, and get the information required
- Prior experience with an ETL automation tool like Query Surge / any other will be an added advantage.
- The candidate will be expected to learn Automation and deliver if he does not have prior experience with Query Surge
- Candidate should be a quick learner and ready to take on new challenges.
- At least 1 years of experience in testing ETL and Data Warehouse applications in cloud environment
- 1 years of writing SQL Queries
- Experience in creating test plans and test cases based on business requirements.
- Thorough knowledge of fundamental quality assurance concepts and best practices is required
- Ability to communicate effectively with both technical and non-technical team members
- Limited immigration sponsorship may be available
- Strong ability to direct and handle multiple, simultaneous projects under deadline pressure and in a fast-paced environment
- Flexibility/adaptability - comfortable working with ambiguity and continually evolving priorities
